18103252	HARSH SHUKLA
18103251	DARSHAN SALECHA
18103256	KAJAL CHAUDHARY

OBJECTIVE

Our project aim at developing user friendly Metro Information System. The purpose is to automate the existing manual system by the help of full fledged application ,so that information can be stored for a longer period with easy accessing and manipulating the same .

Metro Information System, as described above, can lead to error free, reliable and fast management system. Basically the project describes how to manage for good performance and better service for the user.

FUNCTIONALITIES PROVIDED

The provides the user the mentioned services:

- Stations nearby the user.
- Tracks , connecting stations (Shortest route).
- A sequence number for ordering the stations in the route.
- Deals with fare details.
- Manage information of user (entered by user) .

SCOPE OF PROJECT

It may help collecting perfect management in details. It satisfy the user requirement and easy to understand by operator and operate conveniently. It also help in smooth working and procedures will go on smoothly.
